Semarang, Jawa Tengah, 50263

I am a graduate of the Applied Science Degree Program in Computer Engineering Technology, State Polytechnic of Semarang. I have a strong interest and expertise in UI/UX Design and Web Development. I have specialized in UI/UX Design and Website Development for 1 years and I am proficient in using Figma, Canva, Tailwind CSS, and the Laravel framework. Additionally, I have experience in using Next Js, analyzing and presenting data using Google Looker Studio, creating and training Machine Learning models, and developing Internet of Things (IoT) systems to connect and manage devices in real-time. I possess strong communication and time management skills, and I am capable of leading and working in a team, as demonstrated through my internship projects and independent studies, I have been actively involved in organizations for two years and have experience as a speaker at the Training Basic 2022 and PCC Class 2023 on UI/UX topics, and have been trusted to serve as the Executive Chairman of the Techcomfest 2024 Competition and the Deputy Executive Chairman of the National Seminar Techcomfest 2024.

## EDUCATION

---

### State Polytechnic of Semarang

Bachelor of Applied Science in Computer Engineering Technology – IPK 3.76 Sep 2021 – Aug 2025

- Relevant Courses: Human-Computer Interaction, Multimedia, Graphic Design, Information System Design and Development, Dynamic Web Programming, Framework-Based Web Programming, Network Security, Artificial Intelligence, Machine Learning, Data Mining, Big Data, IoT, Embedded Systems.

## Experience

---

### Manifestasi

Sep 2025 – Present

UI/UX DESIGNER | Freelance

- Created a responsive marketplace website with 3 types of users (buyers, sellers, admin) called Khinaya & Developed a Khinaya mobile app design for ordering products (buyers) within 3 months, increasing projected user engagement.
- Redesigned the KSPS website to make it more modern and accessible, completing the UI overhaul in just 1.5 months.
- Delivered a comprehensive redesign of the PPID website for the Dinas Kelautan dan Perikanan Provinsi Jawa Tengah in under 2 months, improving public information discoverability and user intuitiveness.

### PT Violet Global Indonesia

Oct 2025 – March 2026

UI/UX DESIGNER | Contract

- Designed a digital market dashboard and traditional market stock monitoring system named Pasarku (Responsive Website) in less than 2 months, streamlining the stock monitoring process..
- Developed a seamless mobile application design for Pasarku couriers, accelerating the delivery management workflow.
- Created a responsive website design for Omah Lestari, successfully bridging borrowers, developers, vendors, the Central Java Provincial Government, and bank employees into a unified 3-month project delivery.
- Designed an intuitive responsive website dashboard for Narativa, an advanced sentiment analysis tool, completed in 1 month.

### PT Campus Digital Indonesia (Internship & Independent Study Batch 7)

Sep 2024 – Des 2024

UI/UX DESIGNER | [ee](#)

- Became a project leader who led 5 members (2 UI/UX Designers & 3 Software Developers) in a project to create a consultation website called 'PersonalityTalk' and completed the project in 4 months.
- Redesigned the PersonalityTalk website from a static platform into an interactive and user-friendly experience.
- Integrated new features including Consultation, Courses, Mental Health Information, Mental Tests, and Articles.
- Executed the end-to-end design process, from competitor analysis and system architecture to desktop and mobile UI design.
- Created tailored page designs and access workflows for three distinct user roles: users, admins, and psychologists.
- Conducted post-deployment testing and documented comprehensive testing results.

**UI/UX DESIGN** | [🔗](#)

- Demonstrated proficiency in UI/UX principles by successfully delivering multiple portfolios and final projects.
- Acquired a solid understanding of Design Thinking methodologies and the Business Model Canvas framework.
- Mastered the creation of gamification elements, design systems, user flows, wireframes, high-fidelity designs, and interactive prototypes.
- Developed content creation skills, focusing on video editing as well as 2D and 3D animation techniques.
- Sharpened soft skills by organizing webinars and serving as a guest speaker on UI/UX topics on two separate occasions.

**ORGANIZATIONAL EXPERIENCE**

---

**Polytechnic Computer Club**

May 2023 – May 2024

Development Research | [🔗](#)

- Served as Chief Executive for the Techcomfest 2024 Competition, successfully managing a total of 252 participating teams.
- Served as Deputy Chairperson for the Techcomfest 2024 National Seminar, coordinating an event that attracted 41 registrants.
- Coordinated and supervised the Workshop Division along with its sub-departments, including Multimedia, Software, and Network.
- Provided strategic input, feedback, and recommendations to optimize the work programs of UKM PCC.

**Polytechnic Computer Club**

May 2022 – May 2023

Multimedia Department Staff | [🔗](#)

- Responsible for leading the Workshop Division and enhancing the technical hard skills of UKM PCC members and administrators in the multimedia field.
- Served as a trainer for Training Basic 2022, delivering a UI/UX session to an audience of 40 participants.
- Served as a trainer for PCC Class 2023, conducting a UI/UX workshop for an audience of 32 participants.
- Produced 6 comprehensive portfolios specializing in multimedia design.

**Google Developer Student Club Politeknik Negeri Semarang**

Aug 2022 – Aug 2023

Member | [🔗](#)

- Attend events organized by GDSC Polines and GDG Semarang.
- Attend training sessions.

**SKILLS**

---

**Language:** Indonesian, English.**Soft Skill:** Time Management, Teamwork, Public Speaking, Leadership.**Hard Skill:** UI/UX Design, UX Research, Web Development (Tailwind CSS, Bootstrap, Next JS, Framework Laravel), Graphic Design, Video Editing, Data Analyst, Machine Learning, IOT.**Software:** Figma, Canva, Frammer, Visual Studio Code, Antigravity, Github, Gitlab, Corel Draw, Filmora, Capcut, Adobe After Effect, Adobe Photoshop, Trello, Google Looker Studio, Google Colab, Kaggle.**CERTIFICATIONS**

---

- **MTCNA:** Mikrotik (Mar 2025) | [🔗](#)
- **Junior Web Programmer:** BNSP (Aug 2024) | [🔗](#)
- **UI/UX Designer Associate:** Cerns (Aug 2024) | [🔗](#)
- **Data Science BIZ:** CertNexus (Aug 2024) | [🔗](#)
- **Big Data Analyst Associate:** DataLearns247 (Jul 2024) | [🔗](#)
- **Design Thinking: Pengantar Desain Kreatif:** BISA AI (Apr 2024) | [🔗](#)
- **Membangun Prototipe UX Aplikasi Mobile:** BISA AI (Apr 2024) | [🔗](#)
- **Survei Kuisioner & Wawancara dalam UX Research:** BISA AI (Apr 2024) | [🔗](#)
- **Basic Figma: Pembuatan UI Aplikasi Mobile:** BISA AI (Apr 2024) | [🔗](#)
- **Introduction to Gamification:** BISA AI (Mar 2024) | [🔗](#)

- **Memahami Hierarki Visual dalam Desain:** BISA AI (Mar 2024) | [🔗](#)
- **Belajar Dasar Pemrograman JavaScript:** Dicoding (Aug 2023) | [🔗](#)
- **Fundamental UI Design:** Coding Studio (Aug 2023) | [🔗](#)
- **UI/UX Design:** Talenthub (Jul 2023) | [🔗](#)
- **Belajar Dasar UX Design:** Dicoding (Jul 2023) | [🔗](#)
- **UI-UX Research And Design:** MySkill (May 2023) | [🔗](#)
- **Database Programming With SQL:** Oracle (Jul 2022) | [🔗](#)
- **Database Design:** Oracle (May 2022) | [🔗](#)

## PROJECTS

---

- **Redesign Website PPID Dinas Kelautan & Perikanan Provinsi Jawa Tengah**  
This project focuses on the digital transformation of Pejabat Pengelola Informasi dan Dokumentasi (PPID) platform operated by the Dinas Kelautan & Perikanan (DKP) Provinsi Jawa Tengah. Its primary objective is to overhaul the complex information architecture into a more modern, transparent, and user-centric interface, in order to meet public information disclosure standards.
- **Redesign Website KSPS**  
Redesigning the KSPS website from a previously less engaging and outdated interface into a modern, visually appealing, and highly accessible digital platform. The new design focuses on improving user experience through a cleaner layout, intuitive navigation, and responsive design that ensures optimal performance across various devices.
- **Khinaya: Marketplace UI/UX Project**  
Khinaya is a fully responsive marketplace website designed to facilitate seamless buying and selling transactions. The platform supports three primary user roles Buyers, Sellers, and Admins each equipped with specific features and permissions tailored to their needs. Buyers can browse products, make purchases, and manage their orders. Sellers are provided with tools to list products, track sales, and manage their storefronts. Meanwhile, Admins oversee the entire ecosystem, ensuring smooth operations through user management, content moderation, and system monitoring.
- **Omah Lestari UI/UX Project**  
Omah Lestari is a fully responsive, integrated web platform designed to simplify and manage financing processes for home ownership (KPR), home construction, and land purchases. It serves a diverse ecosystem of users including Applicants, Developers, Vendors, the Central Java Provincial Government, and Bank Employees by providing a seamless, role-based system that enhances efficiency, transparency, and collaboration across all stakeholders.
- **Narativa UI/UX Project**  
Narativa is a fully responsive dashboard website designed to perform web crawling, system monitoring, and sentiment analysis in a centralized platform. The system enables users to automatically collect data from various online sources, monitor the health and performance of multiple services or containers in real time, and analyze public sentiment based on text or social media content.
- **Pasarku UI/UX Project**  
Pasarku is a stock monitoring website that records, tracks, and secures the availability of essential commodities across markets in Central Java. It provides real-time stock data to help authorities maintain stable supply and prevent shortages. In addition, Pasarku includes a marketplace feature for buying and selling goods, and currently, the marketplace development has reached the stage of creating a courier mobile app.
- **Momera: Social Media Platform UI/UX Project** | [🔗](#)  
Momera is a social media platform where users can capture, share, and relive their moments because everyone has their own moments.
- **FaceLys: Detection & Recommendations Using Website-Based YOLO** | [🔗](#)  
In fulfilling some of the requirements to become an Applied Bachelor by writing a thesis titled “Skin Health Detection and Recommendation System for the Face Using YOLO-Based Website” with the following tech stack: Detection System (YOLOv11), Recommendation System (TF-IDF & Cosine), Back End (Flask), and Front End (Tailwind CSS), and deployed under the domain name is [facelys.systems](https://facelys.systems).

- **PersonalityTalk UI/UX Project | [🔗](#)**

During the internship, I was assigned to redesign a personality website that was originally a single page and static into a multifunctional, interactive, and user-friendly website, by carrying out a work process starting from competitor analysis, system design, desktop and mobile design, to the testing stage.

- **IRentz Mobile App UI/UX Project | [🔗](#)**

In an individual project, I observed that iPhone rentals still use conventional methods that are inconvenient, lack transparency, and make it difficult to obtain information. Therefore, I chose this case study to create an online iPhone rental application platform.

- **Web Event Organizer Music UI/UX Project | [🔗](#)**

In our independent study, for our capstone project, we created a music event organizer business where we chose to focus on B2B (business to business) by offering clients to fellow businesses (agencies/music labels) and then implemented it by creating a business website.

- **SiKantin Mobile App UI/UX Project | [🔗](#)**

In our independent study, we took a case study on a canteen application that had few payment options, so we made SiKantin user-friendly and equipped it with many payment options.

- **Jobsync Mobile App UI/UX Project | [🔗](#)**

My team received a case study with the theme “Technology for Careers,” which involved designing an application to support careers, an application used to search for jobs, recruit workers, and network. We named it “JobSync.” The purpose of creating this case study was to participate in the 2023 Information Management Identity Competition.

- **Dashboard Penjualan | [🔗](#)**

Assigned to create a sales dashboard based on the provided spreadsheet data, displaying total sales, the number and variety of sales categories, record count, and monthly sales track records in the form of interactive graphs and visualizations.

- **IOT: Water Quality Sensor | [🔗](#)**

To complete a major assignment in the IOT course, we formed a team to create an IOT + AI system with our group using a PH Sensor & Turbidity Sensor with Node MCU, using KNN as AI with a mobile application for monitoring.

- **Sportify Mobile App UI/UX Project | [🔗](#)**

My team was assigned the case study “Creating a Sports Booking Platform,” and we named the platform “Sportify.” The purpose of this case study was for a Talenthub assignment and to serve as part of my portfolio.

- **Portofolio Staff Multimedia: Muhammad Wahyu Anggoro | [🔗](#)**

During my tenure as a multimedia staff member, I created several designs such as a Web Portfolio UI Design, which was created collaboratively by the Multimedia Department, video designs such as the PCC UKM Opening and Regeneration 2023 Teaser using Adobe After Effects, and several graphic designs such as vector photos, posters, and logos.

- **Web Peminjaman Barang Framework Laravel | [🔗](#)**

I created a goods lending website using the Laravel framework. The purpose of this project was to complete the final assignment for the Framework-Based Web Programming course at the end of the semester..

- **Game Rhythm Unity | [🔗](#)**

My team and I created a rhythm game that includes several songs. The purpose of this project was to fulfill the final assignment for the Game Programming course at the end of the semester.
